## Survey Evaluation Results

Dear MARTIN MOHLENKAMP,

In this report, you will find Introductory Data Science results for Fall 22-23.

The overall indicator is listed first. It consists of the following scales:

- Instructor Evaluation
- Course Evaluation

The overall indicator is followed by the individual average values of the scales mentioned above. In the second part of the analysis, the average values of all individual questions are listed.

Sincerely,  
Kara Dunfee, [dunfeek@ohio.edu](mailto:dunfeek@ohio.edu)

2. Instructor Evaluation

2.1) Instructor created an environment that was conducive to learning.

2.2) Instructor gave clear explanations.

2.3) Instructor used helpful examples and illustrations.

2.4) Instructor consistently followed grading criteria.

2.5) Instructor provided useful feedback.

2.6) Instructor provided timely feedback.

2.7) Instructor made herself or himself available for assistance outside of class.

### 3. Course Evaluation

3.1) Outside class activities (readings, assignments, homework, problem sets, etc.) helped me to understand the subject.

3.2) In-class activities (lecture, discussion, handouts, group-work, etc.) contributed to my understanding of the subject.

3.3) This course challenged me intellectually.

3.4) Course grading criteria were communicated clearly.

3.5) Course objectives were met.

### 4. Additional Questions

4.1) Instructor encouraged participation.

4.2) Instructor was respectful to students.

4.3) Examinations were a good test of my knowledge.

4.4) Overall, considering its content, design and structure, this course was excellent.

4.5) Instructor was an effective teacher.

## 5. Open Response

<sup>5.1)</sup> What do you consider to be the greatest **STRENGTH** of the **INSTRUCTOR**?

- Being able to help us understand the coding of what was actually going on. Also helped us conceptually understand what was going on in a graph.
- The instructor allowed for mistakes and did not judge when we asked questions. Very understanding of those of us with little programming experience.
- The instructor was very helpful and understanding. He wants his students to succeed.

5.2) What do you consider to be the greatest **WEAKNESS** of the **INSTRUCTOR**? Suggestions for improvement?

- I don't think the weakness was within the instructor.
- I think that if there were more kids, this class would be very hard. The professor helped us a lot with the coding and there were only 5 of us. So if there were more kids good luck getting to everybody.

5.3) What do you consider to be the greatest **STRENGTH** of the **COURSE**? (texts, content, etc.)?

- I think that the solo readings were actually pretty decent. I can't imagine the course being taught lecture style. Coding is not always intuitive to everyone, so the ability to read and re-read the materials at your own pace worked well. The close-knit environment of the class was perfect. Allowed for the making of mistakes and there was no pressure to get anything right on the first try.
- The homework and labs were very conducive to my learning.
- The textbook helping us with python coding. the homework and labs always kept you thinking and learning.

5.4) What do you consider to be the greatest **WEAKNESS** of the **COURSE**? Suggestions for improvement?

- The biggest weakness for me was all the reading. A lot of the material to actually read through is so boring and took a lot of energy to focus.
- The course had weaknesses. Some of the readings were a little heavy for an intro course. But honestly I am not sure how to improve it. I got a lot out of this course, but I am not sure that everyone will. I think that check-ins with students will go a long way. Keep up the welcoming environment in the future and I think things will be ok.

Best of luck!

- The tests were more difficult than the rest of the course content. I would also prefer lectures and discussions of new content rather than reading it.
